PROFESSIONAL SUMMARY

DevOps Engineer with 4 years of experience in CI/CD, infrastructure as code, Kubernetes, AWS, automation, and production operations. At Flexilant Works, helped build a data architecture platform for SIX Swiss Exchange on OpenShift Kubernetes and improved GitLab CI delivery workflows. Previously supported production infrastructure at NPCI using Terraform, Ansible, Jenkins, GitLab CI, and observability tooling. Work with distributed engineering teams on deployments, platform integration, and troubleshooting.

TECHNICAL SKILLS

CI/CD & GitOps: GitLab CI, Jenkins, ArgoCD, Helm, Git, SonarQube
Cloud & Infrastructure as Code: AWS (EC2, S3, IAM, VPC, CloudWatch), Terraform, Ansible
Containers & Systems: OpenShift Kubernetes, RKE, Docker, Linux (RHEL, Ubuntu), networking, DNS, TLS
Observability: Prometheus, Grafana, Alertmanager, Elasticsearch
Programming & Platforms: Python, Bash, Apache Airflow, PostgreSQL, Trino, Metaflow, MinIO, Rook-Ceph

PROFESSIONAL EXPERIENCE

Flexilant Works Aug 2025 – Present | Remote
Consultant – DevOps / Platform Engineering (Client: SIX Swiss Exchange)

- Helped architect and build a data architecture platform for SIX Swiss Exchange on OpenShift Kubernetes, deploying and integrating Airflow, Trino, MinIO, Metaflow, and Argo Workflows/Events using Helm and ArgoCD.
- Migrated a frontend application's custom GitLab CI pipeline to the organization's golden-path component, adopting standardized build, lint, test, audit, and SonarQube jobs.
- Designed a GitLab CI continuous deployment pipeline for a Python/FastAPI backend, evaluating SSH-based deployment against the organization's Ansible deployment standard.
- Deployed Apache Airflow end to end, authored DAGs, and built workflow monitoring using Prometheus, Grafana, Alertmanager, and Elasticsearch.
- Configured Helm releases for restricted OpenShift environments, working with namespace RBAC, service accounts, private registries, and controlled network access.
- Troubleshoot platform issues involving pod resources, persistent volumes, PostgreSQL connectivity, TLS certificates, secrets, and Kubernetes networking; collaborate with a distributed engineering team.

National Payments Corporation of India (NPCI) Sep 2024 – Aug 2025 | Hyderabad
Senior Associate SRE

- Provisioned and updated infrastructure with Terraform, configured Linux hosts with Ansible, and managed application releases using Helm and ArgoCD.
- Operated production RKE Kubernetes infrastructure with 200+ worker nodes, supporting workload deployments, service routing, networking, and persistent storage.
- Troubleshot Linux and Kubernetes production issues involving resource pressure, scheduling, connectivity, and storage; investigated failures affecting dependent workloads.
- Operated 10PB+ Rook-Ceph distributed storage and MinIO; diagnosed Ceph/OSD failures, recovered affected components, and verified storage and pod health.

National Payments Corporation of India (NPCI) Sep 2023 – Aug 2024 | Hyderabad
Associate SRE

- Maintained Jenkins and GitLab CI pipelines and deployed applications with Helm, including configuration and persistent storage integration.
- Worked with AWS EC2, S3, IAM, VPC, and CloudWatch alongside on-premises infrastructure.
- Operated Prometheus, Grafana, and Alertmanager for Kubernetes and Linux; developed Python and Bash automation for health checks and recurring operational tasks.

National Payments Corporation of India (NPCI) Sep 2022 – Aug 2023 | Hyderabad
Graduate Engineer Trainee

- Set up pre-production Kubernetes and Docker deployments, configured MinIO, participated in initial Rook-Ceph setup, and troubleshot Linux and application deployment issues.

EDUCATION & RECOGNITION

B.Tech in Engineering – Malla Reddy Engineering College (JNTUH) Jun 2018 – Jun 2022
GPA: 8.1/10 | Advanced Certificate in DevOps – Carnegie Mellon University
Well Done Award (multiple occasions) – National Payments Corporation of India
